CROSSWORD: BURNING BIOMASS

Name: ____________________
Date: ________________

Use the definitions below to fill in the blanks with the corresponding numbers in the crossword puzzle.

Across
1. A new option for energy. It’s a renewable resource made from plant material.
4. Land where crops like corn are grown.
5. A very tall grass that can be used as a biomass for fuel. This can be grown on marginal lands.
8. A biofuel made from corn that can be used to replace gasoline.

Down
2. Land that is not used for crops.
3. The ability to do work. It powers our cars, keeps our lights on, and even fuels our bodies.
7. A nonrenewable resource made under the ground that we use for power.
8. University through which CRAFT was established.

The BioEnergy Activity Module (BEAM) Initiative is a project of Eastern Kentucky University’s Center for Renewable and Alternative Fuel Technologies (CRAFT) and is funded in whole or in part by the Appalachian Regional Commission.
